

2018-2019 Columbus & Franklin County Seasonal Influenza Activity Weekly Summary (Week 11, Mar. 10th, 2019– Mar. 16th, 2019)

Highlights

- In week 11 of 2019, the majority of individual local flu activity indicator trend values decreased compared to the previous week. As a whole, flu intensity (composite indicator) decreased and continues to be high.
- Geographic spread and local intensity designation (Click [here](#) for definitions) = WIDESPREAD, HIGH
- Local medical facility labs reported 4,049 tests run with 1,352 (33.4%) positive results for week 11 of 2019.
- The percentage of ED visits for influenza-like-illness (ILI) decreased slightly, while respiratory symptom visits were stable compared to last week.
- In week 11 of 2019, trends for all the local over-the-counter medication category sales tracked decreased (decrease in cough and cold, electrolyte, thermometer, chest rub, pediatric anti-fever, adult anti-fever sales and throat lozenge sales) compared to last week.
- In the U.S., influenza activity remains elevated in the United States. Influenza A(H1N1)pdm09, influenza A(H3N2), and influenza B viruses continue to co-circulate. Please [visit the CDC website for specific information](#).

Local Flu Activity Dashboard (All data are preliminary and may change as updated reports are received.)

¹Interpret with caution. Indicators with small numbers subject to large weekly percentage fluctuations.

²Number of weeks "▲" = Increase (>2%), "▼" = Decrease (>2%), "•" = Stable (-2% to +2%).

³Black line is current years data. Based on data availability, red line is historical average (excluding pandemic year).

⁴Data Source: Medical claims data from athenaHealth® (www.athenahealth.com). Rate of Flu or ILI visits to Ohio (statewide) athenaHealth® network primary care practices/physicians. Claims data are subject to filing and processing time lags. Historical data are updated when they are received.

⁵Franklin County, OH residents only (based on zipcode). NOTE: Excludes one hospital system included in the past due to technical changes affecting visit classification assignment and numbers.

⁶Confirmed cases only. Based on jurisdiction equal to Franklin County or City of Columbus and admission date available in ODRS.

Influenza Morbidity and Influenza-Like Illness (ILI) Reports

In week 11, the preliminary Ohio¹ (statewide) influenza and influenza-like-illness (ILI) visit rate to athenaHealth® providers (38.2 per 1,000 visits) decreased compared to the previous week and is above its baseline average for the week (Figure 1). The week 11 percentage of all Emergency Department (ED) visits categorized as ILI decreased compared to the previous week (Figure 3) and is above its historic baseline for the week.

Nationally, during week 11 of 2019, 4.4% of patient visits reported through ILINet were due to influenza-like illness (ILI). The percentage is above the national baseline of 2.2% for week eleven.

Laboratory Surveillance

During week 11 of 2019, reporting Franklin County sentinel medical facility laboratories tested 4,049 specimens, with 1,352 (33.4%) positive (Figure 4). The total number of tests done by local reporting labs from week 35 of 2018 through week 11 of 2019 is 48,245 with 7,658 (15.9%) positives (7,413 type A, 243 type B, 0 type A and B, 2 type unknown).

Nationally in week 11 of 2019, clinical laboratories reported 34,780 specimens tested for influenza viruses, 9,046 (26.0%) of which were positive (8,724 type A, 322 type B). Public health laboratories reported testing 1,823 specimens, 1,145 of which were positive (1,105 type A – of which 366 were A(H1N1)pdm09, 691 were H3N2, and 48 were not subtyped; 40 type B – of which 6 were Yamagata lineage, 24 were Victoria lineage, and 10 where lineage was not performed). Please visit the CDC website for more information, including cumulative data.

In week 11 of 2019, Ohio clinical labs reported 56,039 specimens tested for influenza this season thus far. Positive results include: (271) A(H1N1)pdm09; (220) A/H3N2; (8,388) Flu A Not Subtyped, and (130) Flu B (through 3/16/2019). In week 11 of 2019, ODH Public Health Lab reported 999 positive influenza tests from specimens sent by various submitters this season so far. Positive results include: (535) A(H1N1)pdm09; (462) A/H3N2; (2) Influenza B (through 3/16/2019). Please visit the ODH website for more information.

ED Respiratory Visits

In the 11th week of 2019, the percentage of all ED visits categorized as respiratory was stable compared to the percentage seen the previous week and is above its baseline for the week (Figure 5).

Over-the-Counter (OTC) Medication Sales

In week 11 of 2019, trends for all the local over-the-counter medication category sales tracked decreased (decrease in cough and cold, electrolyte, thermometer, chest rub, pediatric anti-fever, adult anti-fever sales and throat lozenge sales) compared to last week.
